PROEL EDGE ON ELIO E LE STORIE TESE'S TOUR

"Bellimbusti Balneari" (Beach Coxcombs) is the title of Elio e le Storie Tese's 2010 Summer Tour, an exhilarating cocktail of music and wit mixed up in tunes that tell stories about this complicated world of ours with intelligent lyrics. This explosive musical event is hitting the most important stages in Italy with an audio system chosen by Sonique, the service employed for the production of the show and that has used it in several occasions before, with a setup that is receiving great feedback.

The system features Proel EDGE subwoofers with 21" speakers for low frequencies.

In detail, it includes:

- 16 Proel EDGE121SP Subs
- 2 Proel EDGE15CXPB Coaxial Monitors
- 6 Powersoft K10 Amplifiers
- 4 Powersoft K3 Amplifiers

This same configuration had previously been used (for Milan rapper J-Ax's Tour, for example) with excellent results by Sonique. The system's performance along with the improvement of general logistics that this lightweight setup involves, convinced Sonique's technicians that it would also be the best choice for Elio e le Storie Tese's Tour.

While on tour, the Italian band played most of its witty and irreverent repertoire dictated by the steadfast belief that "our passage on Earth is a continuous series of laughs, almost a convulsive frenzy".
