

BRV120 BW

Instrument cable - 6,3 mm mono plug / 6,3 mm mono right angle plug
Other available lengths: refer to the technical specifications

Cod: BRV120BW

Description

Instrument cable - 6,3 mm mono plug / 6,3 mm mono right angle plug - Cotton covered flexible PVC jacket - Black/White color finishing - 7mm external diameter - Length: 3 m.

BRAVE series professional assembled cables is once again the result of Proel research in following market evolutions. This series is identified for materials used for products realisation , starting from the highest quality of O.F.C copper going on to the special PVC compounds used for jacket and the special cotton roofing that confers a vintage look to the products. Last but not less important the distinctive feature of jackets with an external diameter over 7 mm. For the assembly high quality Proel connectors have been used that in guitar cables present a roofing through an heat-shrink jacket. The variations included in this cable series are the ones more commonly used for guitar and microphone connections and allow the availability of different colours and finishing.
