

We have gone further

CX15A

15" Coaxial Powered Stage Monitor

Weather-proof coaxial transducer with single magnet neodymium motor for a very stable acoustical pattern and great sound intelligibility

Extremely compact and lightweight low-profile birch cabinet suitable for applications where the unobtrusive size is a must

Specially designed front tuning port for a more clean and well-defined sound and an enhanced LF response

96KHz / 40bit floating point CORE DSP and digitally controlled 2000W Class D amplifier with SMPS providing a superior sonic performance and a very high SPL before feedback

AXIOM
The essence of Sound
