VAKES THE A BETTER PLACE

With their robustness, reliability and affordable performance PROEL's Live Microphones provides the perfect choice for different kind of vocalists and different styles. The dynamic models offer a lower sensibility to the environment noise and a better responsiveness to high pressure levels, while condenser models provide ultimate sound quality.

DM580LC

- Dynamic Cardioid Microphone
- Particularly tailored for vocal applications
- Uniform cardioid pattern for isolating the main sound source and avoiding feedbacks
- Durable metal construction
- On/off switch for on-stage control
- Steel mesh ball grille with integral filter for reducing wind noise
- 4.5 mt XLR cable included

HI-GRADE CROPHONES

Our Hi-Grade Series microphones offer a high-quality sound reproduction, capturing every timbre nuance even in the most critical applications. The electro-acoustic design of the capsules, engineered to deliver the highest tone quality, and the sturdy construction meet even the most complex requirements.

HI-GRADE MICROPHONES

DM580

- Professional microphone with Humbucking dynamic capsule
- High applicable SPL
- Cardioid Polar Pattern and reduced sensitivity for the use with high stage
 monitor levels
- Frequency Response and natural bass roll-off for close vocal miking and reducing handling noise
- Particularly tailored for female vocal applications

Туре	Moving coil

RECORDING NCROPHONES

Thanks to the very natural acoustic pattern and to the capability to fit the character of different sources, the comprehensive range of PROEL'S recording microphones offers the right miking solution for many kind of instrument and for different locations, from professional studios to home recording.

EIKON SERIES

EIKON, a line of products researched and designed by our group of passionate engineers, crafted in exact detail, to reproduce every subtle nuance of your music without adding or removing anything.

INSTRUMENT CROPHONES

Picking up correctly different instruments on the stage without feedback or interferences requires specifically designed microphones. PROEL offers different models of high-quality, reliable stage microphones tailored for specific instruments, to be used wired or in a wireless setup.

INSTRUMENTS MICROPHONES

DM1

- Professional dynamic drum microphone
- Cardioid Polar Pattern for an accurate sound reproduction without unnecessary back ground noise
- Frequency Response tailored for percussions, snare drums, toms and other instruments
- High gain before feedback
- Internal shock mount for reduced handling noise
- Compact design reduces stage clutter
- Hardened steel mesh grille

DM12

- Professional dynamic instrument microphone
- Super-cardioid Polar Pattern
- Fast transient response
- Low frequency extension
- Designed to be used with bass drums, bass guitar cabs, tubas and other low frequency instruments
- Internal shock mount for reduced handling noise
- Durable metal construction with hardened steel mesh grille

PA UHFSPLITAL

This professional active antenna splitter / booster splits the signal received from the two main "master" antennas to four diversity channels. Combined with two antennas (UHFGP or ANT700) and four RMW1000 multi-frequency receivers, it forms a high-sensitivity four-channel receiving system. The splitter has four 12VCD outputs for direct power supplying of the 4 wireless receivers.

Frequency band	600 - 865 MHz
Output Connectors	INPUT: 2 x TNC ; OUTPUT: 8 x TNC
Dimensions	H 44 x L 483 x W 250 mm

HEADSET CROPHONES

The progress in microphone technology has brought to a gradual reduction of transducer dimensions, thus microphones can now be so small that it is difficult to spot them. Our Headset Series mics, provided with a choice of connection adapters, can be used in combination with most of the professional wireless systems.

EIKON SERIES

EIKON, a line of products researched and designed by our group of passionate engineers, crafted in exact detail, to reproduce every subtle nuance of your music without adding or removing anything.

- Pristine audio quality
- Lightweight and flexible
- Easy mounting to both the left and right
- Minimal visual impact
- Modular adapter system fits most professional wireless systems

EIKON STUDIO MONITORS

EIKON is the new series of nearfield studio monitors designed by PROEL R&D team in order to provide to your music the most honest and accurate reference possible.

From the carefully selected transducers to the proprietary enhanced waveguides and to the lowresonance cabinet design, everything has been tailored with hours of listening in order to offer the best accuracy over the whole audio spectrum.

The perfectly optimized electronics, including high-headroom separate Class AB amplifiers for high and low section, high-precision crossover networks and separate LIMITEaR circuits, provide maximum resolution and minimum listening fatigue.

The lineup includes three models, featuring 5.25", 6" and 8" woofers, and a 10" subwoofer, offering the ideal nearfield monitor solution for any kind of music production applications: recording studios, home and project studios, broadcast studios, post-production facilities, mobile production vehicles, home theater, multimedia installations.

Soft-dome tweeter for detailed response and a high-resolution sound, with clean and natural high frequencies

Proprietary integrated elliptical waveguide with accurate directivity control, providing a wide and consistent 'sweet spot' (optimal listening position)

Long-excursion woofer with lightweight fiber-glass composite cone, featuring very extended response with well-defined bass and accurate mids

Precisely calculated front tuning port for greater low-frequency extension

Multiple audio input connectors (XLR, $\rlap{\sc 14}'',$ RCA) for simple connections to any kind of source

HF adjustment for a flexible control of high frequency response according to personal taste or room characteristics

HFNC

The HFNC headphones are engineered to sound better, be more comfortable and easier to take with you. The sound is deep, powerful and balanced, and so quiet that every note sounds clearer, you can listen for hours. Any low noise, as engine roar, gently fades away. If the AAA battery runs out, they keep working and you still enjoy music without noise reduction.
